Ibukunoluwa Naphtali

Software Developer

👤 Profile

Experienced Web Developer adept in all stages of advanced web development. Knowledgeable in user interface, testing, and debugging processes. Experienced Software Developer adept in bringing forth expertise in design, installation, testing and maintenance of software systems.

💼 Employment History

Software Developer at Naurs, Dubai

February 2022 — June 2022

At Naurs I worked as the lead project designer and software developer (web, iOS & android). Creating application that connect users from virtual to the physical studio, allowing them monitor and view classes from their comfort zone. Also providing an easy way to purchase classes and packages with the ticket based system.

Mobile Developer at SmartRR, Nigeria

June 2021 — August 2021

Worked with google APIs to create a secured GBV system to help provide service to report and refer cases/incidents of GBV from their smart and basic phones.

Backend Developer at Big Family 360, Yola

February 2021 — April 2021

At BF360 I worked as the lead project back end software developer (web), creating secured payment gateway and donation system. Also participated in the tweaking of the front end animations and designs.

Backend Developer at Parkwell, Lagos

August 2020 — November 2020

At Parkwell I worked as the lead project back end software developer (web). Occasionally, with some help from the marketing team. On the beta we worked closely to get customer feedback, requirements and helped prioritize business goals and revenue models.

German Language Certification

Software Development, Self Taught

January 2019 — July 2019

Self Taught Software Development

I'm an enthusiastic technological person with multiple skills in aspect of tech focusing more on software design and development.

Designer and developer are what many call me, however with skills in areas like photography, videography and editing i consider myself a graphic person :)

With 3 years plus in the industry, i have acquired advance skills working with languages like python, JavaScript, typescript, dart, PHP, HTML, CSS, sass and SQL. And technological tools like Django, Laraval, reactJS, Flutter and PostgreSQL. Allowing me to contribute in the design and development of useful products to the ecosystem.

Out of the blue comes a passionate chef (FoOdy), photographer, travel buddy and gym guy. Nature admiration and art loving are one of the things that keep me going. Not forgetting the love of beats (music).

Hobbies

cooking, traveling, music and movies
